

**FOR
TIDINESS
LOVERS**

Artwork in a kitchen drawer.

Since 2004, *stratmann* has been producing bespoke wooden cutlery inserts. From the very beginning, our leading target was to bring supplementary value to our customers, based on the usability and quality of our mastercrafted products and our personal service.

stratmann offers exactly fitting solutions for all kinds of drawers and pull-outs. We support our customers in planning and realizing their personal drawer interiors. Our products are designed and made to measure for each single customer. Therefore, they are apt to match perfectly the respective kitchen concepts or any other room designs you need to equip. We manufacture drawer inserts for all kitchen and drawer systems in any sizes, starting from „quantity 1“ going up to serial productions.

The work of carpenter craftsmen knowing and loving their business and the simultaneous exclusive use of high-quality solid timber confer to the appreciated excellence of our products.

All of our products are manufactured at our joinery resident in Eastern Westphalia, Germany. Here, made in Germany, cutlery inserts are created the quality of which will last beyond a single kitchen's lifetime. That is our way and contribution to having you enjoy your personal drawer interiors, be it in your kitchen, your dining room, or at any other place at home.

This catalog „For Tidiness Lovers“ covers drawer interiors, the individual components of which are perfectly harmonized. Depending on what is to be stored in the drawers, we offer the right solution. All components are visually and dimensionally coordinated. So, when it comes to questions of „look“ and „harmony“: do not bother, just choose the type of wood you would prefer.

Naming types of wood and colours

Discover our wide range of wood types. Choose the colour that matches best the look of your kitchen from a wide selection of timbers, reaching from light, rather calm maple to darker tones as present in the appealing tone of smoked oak.

You have chosen your colour? We ascertain that any of our high-quality drawer inserts are manufactured exclusively from selected hardwood timbers which have proved to be the best choice for the purpose. We wish you to feel great pleasure for a long time with your drawer inserts.

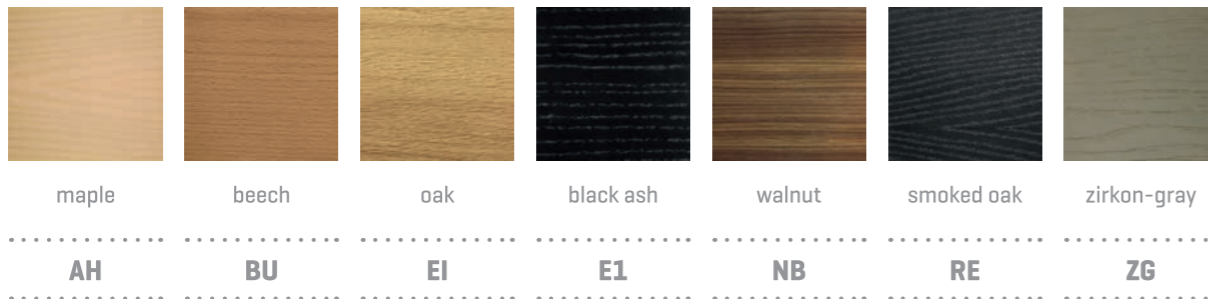

Table of contents

CLASSIC | bespoke cutlery inserts

Cutlery inserts for common table cutlery, serving cutlery, and cooking utensils 10

ADD | add-ons for the CLASSIC program

The ADD articles complement your cutlery organization. Add useful accessories like knife-blocks, foil-dispensers, condiment inserts, spice mills, and others 24

NEO | pull-out tidies

Get sliding pull-outs with 140mm minimum height organized. We present and supply fitting receptacles for the storage of most utensils and food products 36

BASE | storage solutions for dishes and pots

Perforated panels with wooden pegs can be structured individually 46

CLASSIC | bespoke cutlery inserts

First and foremost, cutlery inserts tidy up your drawer. At the same time, they revalue a kitchen by conferring a harmonized and sophisticated look. Thanks to its solid wooden ground and side panels, the CLASSIC cutlery insert obtains a distinctive, warm, and cozy appeal. It knows to easily reconcile practical use with sophisticated taste.

The rectangular panel of solid wood gives both timeless elegance and the maximum stability to this cutlery insert. A variety of subseries offers a maximum partitioning choice. We run a huge selection of dividing possibilities targeting reasonable and well-sorted storage of your cutlery and cooking utensils. The inserts can be easily supplemented by useful accessories like knife-blocks, condiment inserts, or foil dispensers taken from our ADD series.

Furthermore, from page 22 on, you will find a listing of possible special productions.

panels: solid wood, 50/9mm profile, wooden dowel joint

bottom panel: veneer plywood, thickness approx. 4mm, nailed

standard height: 54mm

possible width: 0 to 1150mm

possible depth: 0 to 500mm

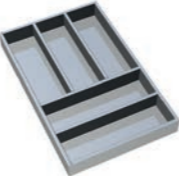

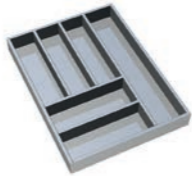

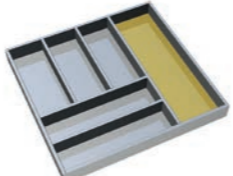

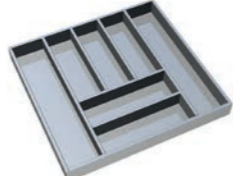

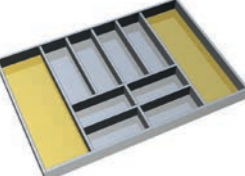

CUCINA CLASSIC

Bespoke cutlery inserts, classic divisions

Classic CUCINA partitioning is based on an arrangement of at least 3 vertical and 2 horizontal compartments. Moreover, this insert offers the opportunity to easily fit in accessory articles (145mm width: c.f. the yellowish marked spaces). You will find a presentation of fitting accessories p.24 following.

The CUCINA CLASSIC insert is being manufactured for any drawer, notwithstanding kitchen brands or drawer measurements.

FREE CLASSIC

Drawer inserts developed and manufactured on the basis of customer's specifications

Our FREE CLASSIC tool invites you to plan individually inserts according to your needs independent of external influences. Create a drawer insert that matches exactly the character and measurements of the things you want to have stored to your satisfaction. A simple sketch will do.

We generate a technical drawing based on your instructions, and we raise a quotation to go with it. Once we have got your o.k., we produce your individual cutlery insert on demand.

CLASSIC | special productions

Complementary design possibilities for all series

Our CLASSIC concept is not yet exhausted, though. Special individual products can be realized on demand. Concerning measurements, our CLASSIC program offers great scope. Surfaces can be lacquer coloured or just oiled. Instead of featuring the standard veneered plywood bottom plate, our inserts can likewise be supplied with a bottom plate coated with felt tissue available in many appealing colour tones. More special features are insert sections divided by adjustable division panels, the integration of very narrow compartments (less than 65mm width), and the realization of siphon cut-outs.

Please note that an amendment concerning the thickness of the panels is not possible nor is the production of frameless inserts.

possible height: 30 bis 100mm · possible width: 0 bis 1500mm · possible depth: 0 bis 630mm
surface: raw, oiled, or lacquered/stained on customer's specifications

ADD | add-ons for the CLASSIC program

Using articles from our ADD series facilitates complementing your drawer inserts. The products from our CLASSIC program are prepared to receive additional accessories like knife blocks, foil dispensers, condiment inserts, spice mills, etc.

Compartments tagged in blue (195 mm width) or yellow colour (145mm width) on the catalog pictograms indicate the places, accessories can be laid in.

All articles run in our ADD series are adapted for quick and easy insertion into the respective compartments.

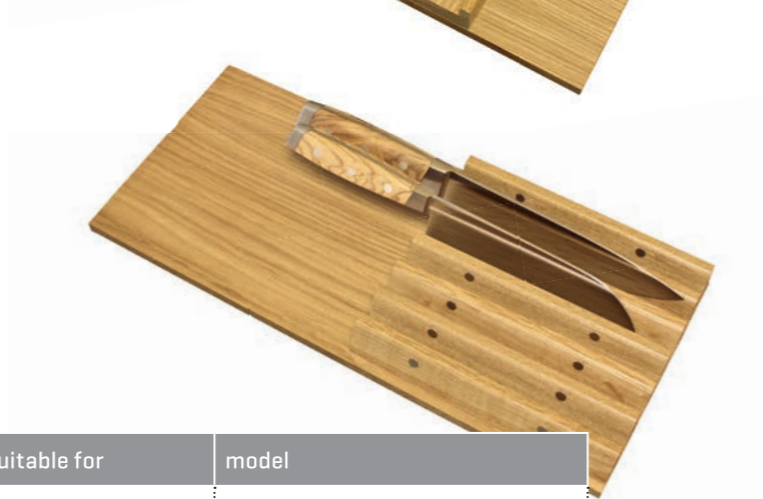

knife block ZMB

Keep your kitchen knives organized and safe in a solid wood knife block. The classic construction allows quick and easy access while the blades are protected at best.

knife block ZMM

Stylish tidiness meets secure holding: This puristic utensil has got two magnetic bars to keep your knives safely in place.

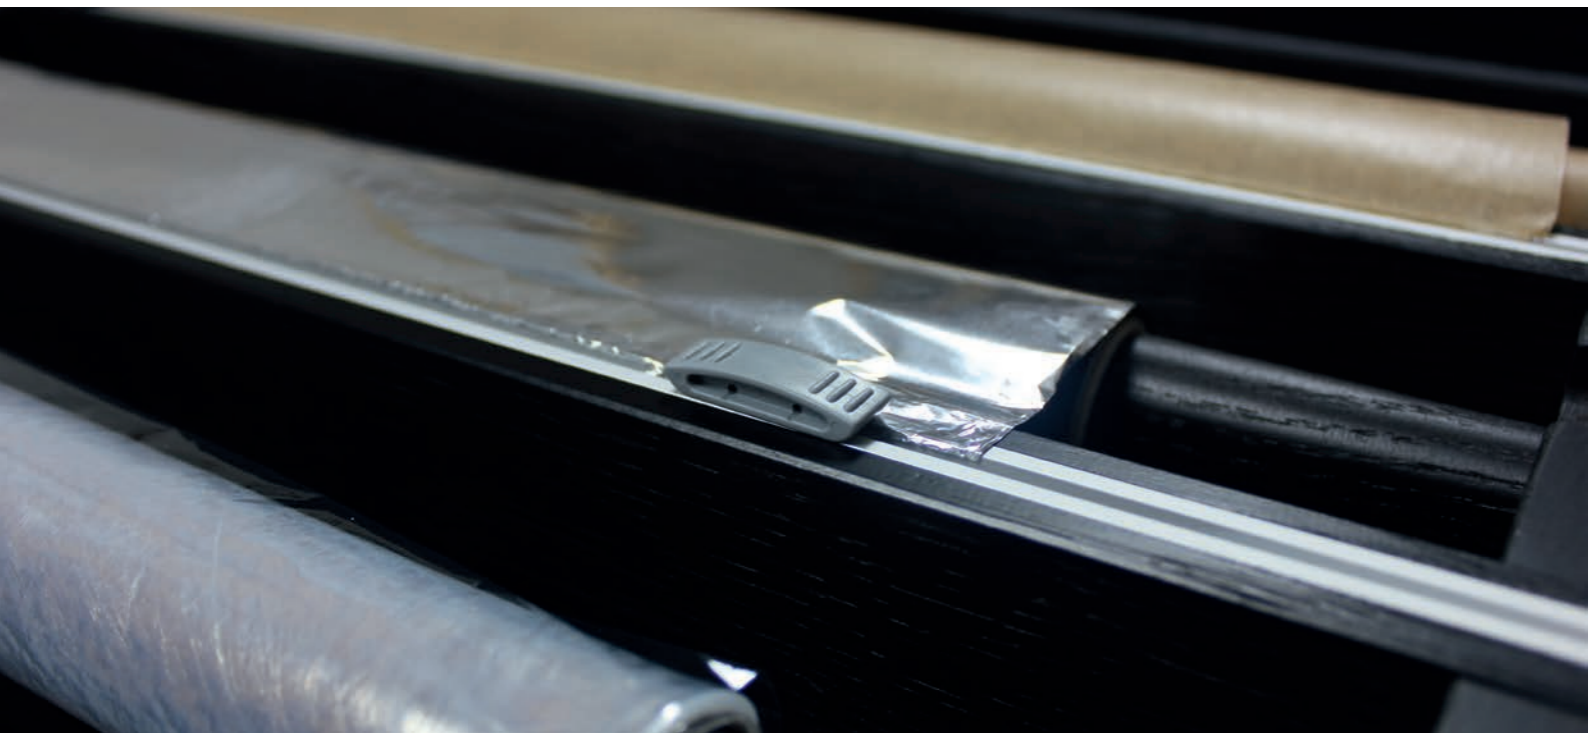

article	order number	width	suitable for	model
knife block ZMB	11ZC ZMB03	95mm		for 3 knives
knife block ZMB	11ZC ZMB04	145mm	yellow compartment	for 4 knives

knife block ZMB	11ZC ZMB09	295mm		for 9 knives
knife block ZMM	11ZC ZMM05	145mm	yellow compartment	for 5 knives, with magnet holders
knife block ZMM	11ZC ZMM07	195mm	blue compartment	for 7 knives, with magnet holders

foil cutter ZFC

Cut smart: the movable blade, the handle of which emerges from the middle panel, slides to easily cut any kind of foil.

This product is available in two varieties. Version A: the cutter is planned to be part of an insert right from the beginning so that the cutting panel is installed as a fix part of the insert. Version B: The cutter comes separately with a frame on its own. Thus it can be handled as an independent drawer insert or as an adapted supplement that is to fit into a 145mm or 195mm compartment.

foil holder ZFA

This foil holder is designed to keep any kind of foils at hands: aluminum foil, cling film, or baking paper. Each roll is laid into one compartment the serrated lid of which facilitates the withdrawal. This holder is available with two (145mm) or three (195mm) lids and manufactured as a firmly mounted part of an insert.

article	order number	width	suitable for	model
foil cutter ZFC	11ZC ZFC02	145mm	yellow compartment	permanently installed in the insert
foil cutter ZFC	11ZC ZFC03	220mm	blue compartment	permanently installed in the insert

spice glass ZFU	10HA ZFU01	Ø 45mm, H 124mm		spice glass

spice insert ZFU

Manufactured from solid wood, the ZFU is a precious wedge-shaped spice insert with milled semicircular grooves which keep the lying spice jars in place. This insert was designed with regard to the most common available tall and slim spice glasses, suitable for receptacles with diameters up to 45mm and heights of 140mm maximum.

This article includes a set of spice glasses and a sheet with self-adhesive labels featuring the names of the most appreciated spices. Fits into yellow or blue tagged compartments.

spice glasses for ZFU

Classical cylindric glasses for all kinds of spices. The plastic dual cap features a 4-hole-spreader as opposed to a wider spreading opening.

dimensions: 45 x 124mm (Ø x height)

content up to 110ml

spice steps ZGT

Thanks to its stairs-shaped design, this universal spice insert allows the storage of spice receptacles in different dimensions. Each item is handcrafted using veneered MDF and fits exactly into either a yellow or a blue tagged compartment. Will be delivered without spice cans.

spice mill holder ZGM

Our spice mills ZGM find their places in our brand new mills holder insert. This product is manufactured from solid wood featuring one milled semicircular profile for each spice mill. Upgrade your drawer interior using this insert.

Available for yellow tagged (four spice mills) or blue tagged (six spice mills) compartments.

spice mills for ZGM

NEW! Our appealing and functional spice mills made of glass and stainless steel, incorporating a high-grade ceramic grinder.

dimensions: 52 x 140mm (Ø x height)

content up to 110ml

NEO | get pull-outs organized

Tidying systems for pull-outs with a minimum height of 140mm. Our NEO series features appropriate solutions for the storage of any kind of utensils or provisions.

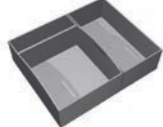

The rectangular NEO panel from veneered Multiplex all around matches perfectly the inserts chosen from our CLASSIC program. Mitred connections and middle layers glued multiple times confer to the special stability of this product series.

In this program, the single articles are considered as modular and combinable at discretion. Choose from our pre-configured sets or find and arrange the suitable articles for your individual pull-out yourself.

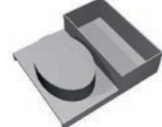

The standard will not do for you? Find more and special products on a listing at p.52.

BOX

The BOX articles are manufactured individually and on measure, thus they can be adapted to form the perfect completion for the interior equipment of your own pull-out.

PORTABLE BOX

As the extended version of the BOX, the milled handles of this article are destined to facilitate the handling. We recommend the installation of two handle boxes in a row so as to facilitate the grip and to grant the furnishing to the entire depth.

DIVIX

The adjustable dividers of DIVIX make it the appropriate solution for the storage of the thousands of smaller things that need to similarly find their place in an organized kitchen. Enjoy in DIVIX the effective combination of functionality and flexibility that helps tidy up your pull-out.

Available in two widths.

PANE

Our new ceramic bread bin PANE with its cap made of solid wood will help to keep your daily bread longer fresh and appetizing. The oval ground plan of the bread bin measures 350 x 230mm, the height is 135mm (incl. cap).

ALFA

The holder for kitchen rolls ALFA is another consistent part of our pull-out furnishing concept. It has got a lid made of stainless steel with a tear-off edge. The compartment for the kitchen paper roll has got a length of about 350mm.

BASE | smart storage of table dishes and pots

Our perforated boards BASE made of veneered MDF are available in any of our timber types. This and the wooden pegs form a reliable and flexible toolset to have the rather space-consuming elements among your kitchen utensils securely, orderly, and economically stored.

The BASE program combines a perforated ground board cut to the exact measurements of your drawer pull-out and a selectable number of manufactured wooden pegs fixed from below by knurled screws. A smart system to keep your dishes, pots, etc. in place. Furthermore, our TRIAS holder for pot lids may serve to provide the appropriate storage place within your drawers.

The standard will not do for you? Find more and special products on a listing at p.52.

BASE | perforated boards

Find BASE, the solution concerning the storage of your table dishes and your pots to your drawer pull-outs. These perforated boards and the wooden pegs allow easily and efficiently give structure to your drawer furnishing. Since the wooden pegs are to be fixed from below with knurled screws, you have got free hands to create your individual drawer layout and to securely store your dishes and pots.

Our perforated boards BASE made of veneered MDF are available in any of our timber types. They match perfectly our cutlery inserts and pull-out furnishing sets.

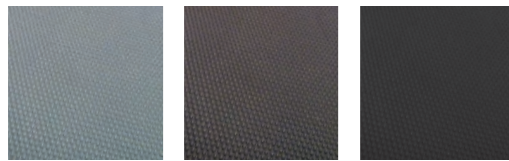

TRIAS | holder for pot lids

The TRIAS holder is our answer to how to put pot lids into a drawer, the less space-consuming possible. The number and the sizes of the slots are dimensioned to fit the requirements of the average „collection“ of pot lids present in a common household. TRIAS is convincing not only due to its functionality but also by its appealing look and its high-quality material.

ARMA | slip-stop mats

Our prism-structured slip-stop mats made of natural rubber can be of multi-purpose use. Maybe an ideal start if the final decision of how to finally equip your drawers requires some more maturing

The slip-stop mats are cut exactly to the measure. We may also supply mats for oversized depths on demand.

NEO und BASE | special productions

More options for deep drawer dividers

Our deep drawers organizing programs NEO and BASE still offer more. Special customized products can be realized on demand. Our specialized products for deep drawer organization offer a great scope concerning feasible measurements just comparable to the extra made products of our CLASSIC program for drawer cutlery inserts. May we draw your attention to our article NEO BOX which can be manufactured up to a width of 500mm and equipped with fixed dividers on demand. The wooden pegs of the BASE program can be shortened down to 60mm height if required.

Surface treatments like special colours, clear lacquering and natural oilings match those shown by the CLASSIC program.

NEO

possible height: 101 bis 250mm

possible width per element: 0 bis 1500mm

possible depth: 0 bis 630mm

surface: raw, oiled or lacquered/stained on customer's specifications

BASE

possible total height: 77 bis 177mm

possible width per element: 0 bis 1500mm

possible depth: 0 bis 630mm

surface: raw, oiled or lacquered/stained on customer's specifications

MORE FOR THE KITCHEN

Some things must not be missing in any kitchen. Sometimes, however, these get stowed away into a drawer or cupboard. More often, however, trays, bottle holders, or chopping boards are left lying around open on the worktop. They may become disturbing obstacles. Our special editions, manufactured in the best quality craftsmanship, match our drawer interior concept perfectly. The warm and calm character of wood emphasizes the overall picture of your kitchen and creates a cozy ambiance.

DETROIT | butcherblock

This heavyweight butcherblock is cut off 60mm thick oak timber. Its weight makes it lie firmly and securely on the worktop. Two handle millings facilitate working with this board.

dimensions (w/d/h): 320 x 445 x 60mm

QUEBEC | tray

Solid craftsmanship and evergreen design are married in our Quebec tray thus joining functionality and high-grade esthetical demands.

This real classic made of solid wood with finger-joint edges is available in any of our timber types.

dimensions (w/d/h): 472 x 350 x 50mm

MONTREAL | cutting board

This large cutting board made of solid wood is available in timber types beech, oak, ash, and walnut. Two milled handles and a folded underside sustain its excellent usability.

dimensions (w/d/h): 472 x 300 x 30mm

article	order number	dimensions
butcherblock DETROIT	10BR DET34	320 x 445 x 60mm
tray QUEBEC	10BR ZTTQC	472 x 350 x 50mm
cutting board MONTREAL	10BR MO130	472 x 300 x 30mm

Quick start guide

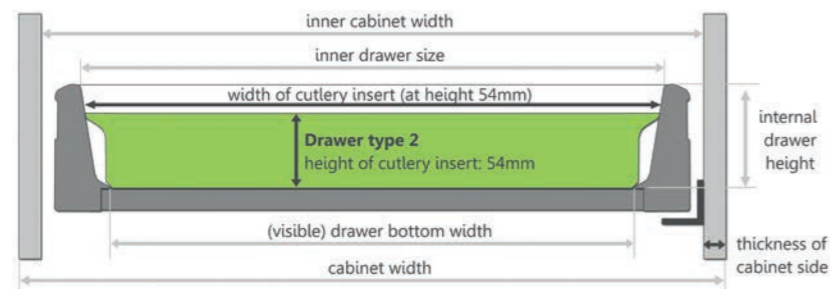

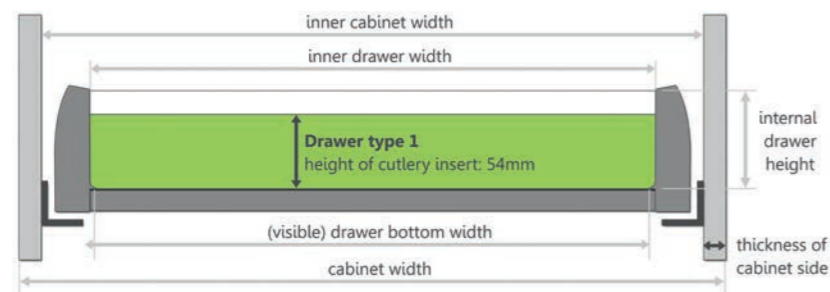

The schematic representation below of a cabinet and its drawer (types) shows and explains which measurements taken where are required to get what is called a bespoke cutlery insert.

The height of our cutlery insert is fixed at 54mm.

The length (= depth) of our cutlery insert is calculated: drawer inner length - 2mm

The width of our cutlery insert is calculated: drawer inner width (taken at 54mm height) - 2mm

If the drawer's side panels go vertically down to the bottom, please indicate straight edges (= Z1) when asking for a quotation or placing an order. This type of edge also compensates a minor transition border (4mm maximum) while hitting the bottom. If the drawer's side panels go down slanting to the bottom, please indicate slanting edges (= Z2) when asking for a quotation or placing an order. This implies that the bottom width of the cutlery insert may be inferior by up to 36mm compared to its top edge width.

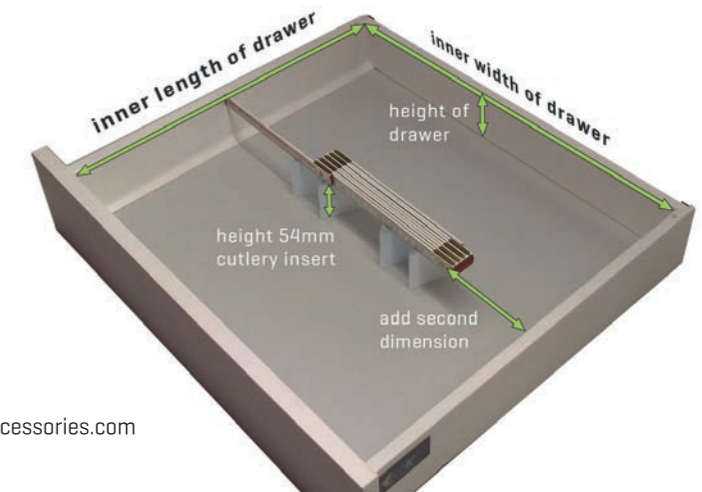

Standard dimensions

	Blum Tandembox	Blum Legrabox/ Grass Vionaro/ Hettich AvanTech	Blum Merivobox	Grass NovaPro	Grass DWD-XP	Hettich ArciTech
drawer sides	slanting [2]	straight [1]	straight [1]	straight [1]	slanting [2]	slanting [2]
depth	NL - 28mm	NL - 28mm	NL - 28mm	NL - 21mm	NL - 28mm	NL - 28mm
width of ground slip-stop mat ARMA	LM - 84mm	LM - 44mm	LM - 59mm	LM - 66mm	LM - 82mm	KB - 122mm
width of cutlery insert CLASSIC	LM - 50mm	LM - 44mm	LM - 59mm	LM - 60mm	LM - 64mm	KB - 108mm
width of pull-out divisions NEO	LM - 72mm	LM - 44mm	LM - 59mm	LM - 60mm	LM - 78mm	KB - 120mm
width of perforated board BASE	LM - 68mm	LM - 44mm	LM - 59mm	LM - 60mm	LM - 78mm	KB - 120mm

LM = inner cabinet width = cabinet width minus 2 x thickness of cabinet sidewalls

NL = nominal length of the drawer frame

KB = cabinet width
